

## For iOS

Step	Instruction
1	<p>Open the Files app on your iOS device<sup>1</sup>.</p>  <p><sup>1</sup> If you have deleted the Files app, you will need to reinstall the app via the App Store.</p>
2	<p>On the Browse screen, tap the button (the circle containing three dots) at the top-right corner of the screen. Select “Scan Documents” from the pop-up menu.</p> 
3	<p>Tap on the icon with the 3 rings, then select “Black &amp; White”.</p>

	<div data-bbox="416 192 809 1034"></div> <div data-bbox="874 192 1267 1034"></div> <p>Position the document within your device's screen. The camera will try to detect a document and automatically capture it. Otherwise, you may tap on the round icon at the bottom of your device screen to manually capture the scan.</p> <p>Scan <b><u>all pages</u></b> of your medical examination report.</p> <p>If you would like to retake a page, click on the image icon to open the image, then tap "Retake" located on the top right-hand corner.</p> <p>When you are done, tap "Done", then tap "Save".</p>
