

LICENSING CONDITIONS FOR LICENCE TO STORE EXPLOSIVE PRECURSORS

1. The licensee shall implement and maintain —
 - a) the security measures in accordance with the security proposal approved by the Licensing Officer; and
 - b) such other security or safety measures as the Licensing Officer may, from time to time, direct.
2. The licensee shall ensure that only such of his agents, employees and other persons as are authorised by him have access to the licensed premises.
3. The licensee shall ensure that all activities involving any explosive precursor in the licensed premises are carried out in a manner that ensures the safety and security of all persons and property exposed to the risks.
4. The licensee shall ensure that his agents, employees and other persons who are engaged in the handling of any explosive precursor in the licensed premises are adequately trained in the safe handling of the explosive precursor.
5. The licensee shall ensure that any explosive precursor in the licensed premises that has expired and that is unsafe for storage is immediately removed from the licensed premises and disposed of.
6. The licensee may only store the prescribed type of explosives precursor on the licensed premises as stated in the licence unless otherwise approved by the Licensing Officer in writing.
7. The licensee may only store up to the prescribed quantity of explosive precursor as stated in the licence, unless otherwise approved by the Licensing Officer in writing. For the avoidance of any doubt, any import licence issued to the licensee to import any explosive precursor does not constitute an approval by the Licensing Officer to increase the quantity of explosive precursor stored on the licensed premises.
8. The licensee shall ensure that closed-circuit television (CCTV) cameras and a CCTV recording system are installed and maintained at the premises in accordance with the Video Surveillance System (VSS) Standard for Building published by Singapore Police Force. A copy of the VSS Standard can be obtained from weblink: <https://www.police.gov.sg/Advisories/Infrastructure-Protection/Building-Security> .
9. Unless otherwise exempted by the Licensing Officer, the licensee shall ensure that all CCTV cameras and recording system(s) remain in good working condition at all times.
10. The licensee shall hand over all CCTV camera recordings to the Licensing Officer when directed to do so.
11. The licensee shall not tamper and shall not permit anyone to tamper with the CCTV cameras, the recording system(s), and any CCTV camera recordings. For the avoidance of doubt, “tamper” means doing anything which may interfere with the proper functioning of any of the CCTV cameras and recording system(s) and/or the proper storage and retention of any of the CCTV camera recordings.

12. The licensee shall label the licensed explosive precursor according to the Singapore Standard 586.
13. The licensee shall notify the Licensing Officer of any change of any Director or shareholders (as reflected in Accounting & Corporate Regulatory Authority records) within 7 days of any such change via GoBusiness.
14. The licensee shall notify the Licensing Officer of any change to the company's business address at least 7 days before the change takes effect via GoBusiness. For the avoidance of doubt, this does not include any change to the address of the licensed premises for carrying out of the regulated activities, which will require a fresh licence application.
15. The licensee shall keep and maintain a register book which shall contain the following information:
 - a) the date on which any licensed explosive precursor is taken into stock, manufactured, imported, exported, sold, supplied, transferred or removed, where applicable;
 - b) the licence number to which the licensed explosive precursor relates;
 - c) the description, quantity and concentration of the licensed explosive precursor;
 - d) the name, identification number (such as, NRIC number, foreign identification number, passport number or business registration number) and address of:
 - e) the person from whom the licensed explosive precursor is purchased or received; and
 - f) the purpose of each transaction involving the licensed explosive precursor.
16. Every licensee shall keep the records contained in the register book for a period of not less than 3 years.
17. The licensee shall immediately report to the Licensing Officer any attempted theft, any suspicious incident that threatens the security, of any explosive precursor in the licensed premises or any safety related incident involving any explosive precursor. For the purpose of this condition, reporting to the Licensing Officer includes reporting the matter via calling '999'.
18. The licensee shall allow and facilitate any audit or inspection (including any surprise check) of the arm, explosive, explosive precursor, or licensed premises by the Licensing Officer or any officer authorised by the Licensing Officer in writing. For avoidance of doubt, an authorised officer may:
 - a) enter any licensed premises;
 - b) inspect the licensed premises and any arm, explosive or explosive precursor found within;
 - c) photograph or film, or make a record or sketches of, any part of the premises, or any person or thing at the premises;

- d) require any person on those premises to produce or grant access to, without charge, any document, information or article reasonably required, which is in the possession or under the control of that person;
- e) inspect and make copies of or take extracts from any such document or article; and
- f) take possession of such a document or article if, in the opinion of the authorised officer that the inspection or copying of or extraction from the document or article cannot reasonably be performed without taking possession, the document or article may be interfered with or destroyed unless possession is taken, or the document or article may be required as evidence in any proceedings instituted or commenced under the Arms & Explosives Act 1913.
