Section B- Request for Powers under IPA

Will the Authority restrict photography of the proposed PA/PP² from outside the PA/PP:

Yes

No

If yes, please state

(i) When and how the Authority intends to enforce the photography restrictions?

(ii) The Point-of-Contact (POC) for public enquiries:

(iii) Whether the Authority intends to request the designation of authorised officers³ to exercise powers to restrict photography by unmanned aircraft:

Yes, powers under s 30(3)(a) of the IPA⁴ are required for designated authorised officers

[Please provide in a separate attachment/enclosure: (i) the personal particulars (Name, NRIC) of the list of intended designated

² Under s 30(1) of the IPA, a person must not take any photograph of a PA/PP without the permission of the authority of the PA/PP. If the Authority intends to restrict photography of the PA/PP, it is good practice for the Authority to give reasonable notice to the public before enforcing the restriction on unauthorised photography. This may be achieved, for example, through signage, circulars, or information posted on the company website or printed on access passes.

³ This refers to the designation of authorised officers under s 30(1) of the IPA. SPF generally limits the granting of power under s 30(3)(b) to designated authorised officers because specialised technology and skills/training are usually required to assume control of the unmanned aircraft to fly it or end its flight, land it safely in the fastest practical way, or to end the flight in the fastest and safest practical way. If the Authority assesses that the power under s 30(3)(b) is critical for designated authorised officers to carry out their duties, the Authority may make the request to SPF separately, providing justifications for the request.

⁴ Under s 30(3)(a), the designated authorised officer may direct any person whom the designated authorised officer reasonably believes to be involved in the operation of the unmanned aircraft (i) to end the flight of the unmanned aircraft, or land it, safely in the fastest practicable way; or (ii) to fly the unmanned aircraft in the manner specified by the designated authorised officer.
