**RED FLAG INDICATORS FOR APPROVED CIS TRUSTEES**

**General Comments**

The list of situations given below is intended to highlight some basic ways in which money may be laundered or used for TF purposes. While each individual situation may not be sufficient to suggest that ML/TF is taking place, a combination of such situations may be indicative of a suspicious transaction. The list is intended solely as an aid, and must not be applied as a routine instrument in place of common sense.

The list is not exhaustive and may be updated due to changing circumstances and new methods of laundering money or financing terrorism. Approved trustees are to refer to STRO’s website for the latest list of red flags.

A customer’s declarations regarding the background of such transactions should be checked for plausibility. Not every explanation offered by the customer can be accepted without scrutiny.

It is reasonable to suspect any customer who is reluctant to provide normal information and documents required routinely by the approved trustee in the course of the business relations. Approved trustees should pay attention to customers who provide minimal, false or misleading information, or when applying to establish business relations, provide information that is difficult or expensive for the approved trustee to verify.
